**5) SPECIES CONSIDERED BUT NOT INCLUDED (102 species)**

Species considered by the BAT and CAC, but not recommended for inclusion in the SEP-HCP. Reasons for not addressing these species in the plan may include one or more of the following considerations:

- known range does not include the Plan Area;
- lack of habitat within the Plan Area;
- only incidental or occasional occurrence in the Plan Area;
- utilizes habitats not likely to be targets of conservation efforts for the covered species;
- insufficient existing information on the biology, habitat, threats, or conservation measures for the species;
- species is currently unlisted and/or no current listing petitions are under consideration;
- addressing the conservation needs of the species would be out of scope for the current project; and
- other reasons, as described.
